

Core

The diagram illustrates a software architecture. A large, light-blue rectangular container with a dashed border is labeled 'Core'. Inside this container, there is a smaller, solid light-blue rectangular area with a thick black border. Within this inner area, there are three components: 'PFlogs' and 'Debug' are each enclosed in a small blue box with a black border, while 'Utilities' is represented by text alone. The components are arranged horizontally from left to right.

PFlogs

Debug

Utilities
