

updateClassInstantiation

updateUseStatement

buildNamespacedClass

```
graph LR; A[updateClassInstantiation] --> C[buildNamespacedClass]; B[updateUseStatement] --> C;
```

The diagram illustrates a flow where two separate update operations, 'updateClassInstantiation' and 'updateUseStatement', both lead to a single 'buildNamespacedClass' operation. The boxes for the first two operations are white with black borders, while the final box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
